EXPERIENCE

Software Developer

Intugine Technologies

04/2019 - Ongoing Bangalore

- Technical Product Ownership of 2 products and complete product ownership of 1 product.
- Built back-end for all 3 owned products (1 product being used Pan-India and others are being used by a few of the Industry Giants) and multiple small modules that were plugged in other products.
- Actively involved in revamp for all the 6 products which are part of a single platform.
- Combined 7 different but similar dashboards into 1 for easy maintenance and monitoring which freed up-to 40% bandwidth for developers and operations team alike.
- Active participation in client-discussions both on call and face to face.
- Introduced and built 2 dashboards for smoothing out the work of operations team which in turn saved extra 10% of the tech-team's bandwidth which was used for related queries.
- Built a NPM package wrapping MongoDB API's and initiated the development of a standard in-house React component library for ease of development which is currently being used by our whole tech team.
- Initiated and helped in partially standardizing the code lint and responses for our API's throughout the products. (Integration currently in progress)

Extras (Intugine)

- Acting as a pseudo-manager for our tech team (team of 13).
- Mentored 3 interns of which 2 are currently working full-time with us.
- Part of the hiring team. (IQ Round).
- Captain of Team Maverick (Total 3 Teams), won 1st in-company co-curricular competition.
- Introduced monthly awards with-in tech team to appreciate employee's hard work while maintaining a healthy feeling of competition among them.
- Also responsible for arranging team outings for tech team.

Web Developer

Ivety Solutions

08/2018 - 04/2019 Location

- Built messenger Chat-Bot app using Chat-fuel, Dialog-flow, MongoDB, and NodeJs.
- Designed and developed 2 web application development and bug fixes.
- Increased application traffic conversion by 11% by redesigning platform to increase mobile and web usability.
- Actively involved in Product exploration relevant with my work.

TOOLBOX

Active Tech Stack

JavaScript Node.js Express.js

MongoDB AWS git REST
